

Master Copyright Declaration & Intellectual Property Registry

Owner & Creator: Morley Moses Apooch [cite: personal_context:retrieve_personal_data]

Beneficiaries: Camden Apooch and Charlize Apooch [cite: personal_context:retrieve_personal_data]

Legal Status: Copyright Protected (Canadian Intellectual Property Rights) [cite: personal_context:retrieve_personal_data]

1. Statement of Ownership & Intent

This document serves as the formal legal declaration and intellectual property registry for all software applications, algorithms, security frameworks, source code, and technical documentation authored by Morley Moses Apooch [cite: personal_context:retrieve_personal_data]. All proprietary rights, copyrights, title, and ownership interest in the software solutions listed herein are fully retained by the creator, with legal assignment dedicated as a family legacy for Camden Apooch and Charlize Apooch [cite: personal_context:retrieve_personal_data].

2. Software Asset Inventory

Project / Asset Name	Primary Function & Description	Ownership & Rights Status
Debugger - Security Anomaly Detection System [cite: personal_context:retrieve_personal_data]	Security application for monitoring system integrity, detecting runtime anomalies, process inspection, and core dump analysis. [cite: personal_context:retrieve_personal_data]	Copyright (c) 2026 Morley Moses Apooch. All Rights Reserved. [cite: personal_context:retrieve_personal_data]

Project / Asset Name	Primary Function & Description	Ownership & Rights Status
MOPROTEC [cite: personal_context:retrieve_personal_data]	Proprietary security architecture and development framework. [cite: personal_context:retrieve_personal_data]	Copyright (c) 2026 Morley Moses Apooch. All Rights Reserved. [cite: personal_context:retrieve_personal_data]
Anomaly Engine [cite: personal_context:retrieve_personal_data]	Core real-time security analytical engine for identifying threat vectors. [cite: personal_context:retrieve_personal_data]	Copyright (c) 2026 Morley Moses Apooch. All Rights Reserved. [cite: personal_context:retrieve_personal_data]
DDoS Firewall [cite: personal_context:retrieve_personal_data]	Network traffic protection and distributed denial-of-service mitigation system. [cite: personal_context:retrieve_personal_data]	Copyright (c) 2026 Morley Moses Apooch. All Rights Reserved. [cite: personal_context:retrieve_personal_data]
CleanHandsPrototype	Application framework with embedded wallet balance and loan processing modules.	Copyright (c) 2026 Morley Moses Apooch. All Rights Reserved.

3. Universal Code License & Copyright Header

The following formal copyright header is embedded into the source files, modules, and repositories across all created applications:

```
/*  
 * Copyright (c) 2026 Morley Moses Apooch. All Rights Reserved.
```

```
*  
* PROPRIETARY AND CONFIDENTIAL  
*  
* All software code, algorithms, architectures, and associated documentation  
* contained herein are the exclusive intellectual property of Morley Moses Apooch.  
*  
* Title and full legal rights are assigned as a family legacy for  
* Camden Apooch and Charlize Apooch.  
*  
* Unauthorized copying, modification, distribution, reverse engineering,  
* or extraction of this code via any medium is strictly prohibited without  
* prior written authorization from the owner.  
*/
```

4. Cryptographic Proof & Integrity Verification

To establish an immutable chain of evidence and verify the timestamp and integrity of all source code files, each build or source release utilizes cryptographic hashing (SHA-256) and digital signature records [cite: personal_context:retrieve_personal_data].

Automated Evidence & SHA-256 Hashing Script

```
const crypto = require('crypto');  
const fs = require('fs');  
  
function generateCopyrightEvidence(filePath, author = "Morley Moses Apooch") {  
  const fileBuffer = fs.readFileSync(filePath);  
  const hashSum = crypto.createHash('sha256');  
  hashSum.update(fileBuffer);  
  const hexHash = hashSum.digest('hex');  
  
  const evidenceRecord = {  
    author: author,  
    filePath: filePath,  
    sha256: hexHash,  
    timestamp: new Date().toISOString(),  
    copyrightNotice: "Copyright (c) 2026 Morley Moses Apooch. All Rights Reserved.",
```

```
    beneficiaries: ["Camden Apooch", "Charlize Apooch"]  
  };  
  
  console.log("=== INTELLECTUAL PROPERTY EVIDENCE RECORD ===");  
  console.log(JSON.stringify(evidenceRecord, null, 2));  
  return evidenceRecord;  
}
```

5. Legal Protection & Next Steps

- **CIPO Registration:** Maintain documentation aligned with Canadian Intellectual Property Office (CIPO) copyright registration standards [cite: personal_context:retrieve_personal_data].
- **Git Commit Signatures:** Ensure all GitHub commits are signed with cryptographic GPG keys under handle @moapooch121-droid to maintain an unbroken audit trail.
- **Notarized Statement:** Maintain a signed affidavit / statement of testimony witnessed by a notary or lawyer for official court-admissible evidence if required [cite: personal_context:retrieve_personal_data].
